Daily weather forecast mobile web progressive app
Created on March 17, 2020 at 08:

Weather app

Task
Create a custom simple and having weather progressive web application for the smartphone so that the users can easily check out the weather forecast.

The result
Weather app is a simple app which shows you the current, hourly and detailed view 10 or short 30 days forecast. Search and saved locations to check your favorite locations. Customize units, colour theme, choose if you want to see more details in the location main screen.

Search & save locations
